Case Management Working Group

Purpose and objectives

- ❑ To minimize wasteful duplication, maximize synergies, and encourage harmonisation and pooling of efforts for faster uptake and scale up of malaria case management strategies and interventions
- ❑ The main objectives of this group mirror the functions of the RBM partnership
 - Convene: Provide a forum for the dissemination of the normative and policy-setting guidelines of WHO and for sharing best practices for adaptation and implementation by international and country-level partners
 - Support the scale up and implementation of policies and strategies to ensure universal coverage and access to quality malaria case management in endemic countries
 - Coordinate: Align and facilitate collaboration between partners to avoid duplication and inefficiencies; sharing experiences and best practices; and identification of challenges or bottlenecks for discussion by the working group.

The sponsorship of selected NMCP Officers is kindly funded by the Swiss Agency for Development and Cooperation (SDC) through the GlobMal project at Swiss TPH and PMI through the PMI Impact Malaria Project.
